

Installation Guide for Node.js

Step 1 (Check if you already have node.js installed):

- Open your Terminal.
- Type “node -v” and Enter (-v means version)
- If node is already installed, you will see a version number displayed
For example, in my case it printed v12.13.0
- If you see the version, you are all set. No further steps required.

Step 2 (Download Node.js):

- Go to <https://nodejs.org/en/>
- Download the LTS version. This is the version recommended for most users.
- Once download is complete, launch the downloaded file and follow prompts.

Step 3 (Making sure installation was a success):

- Go to Step 1 and check the version.
